IMPORTANT NOTICE

International application No. PCT/CA97/00745

International filing date (day/month/year) 15 October 1997 (15.10.97)

Priority date (day/month/year)

Applicant

NATIONAL RESEARCH COUNCIL OF CANADA et al

1. Notice is hereby given that the International Bureau has communicated, as provided in Article 20, the international application to the following designated Offices on the date indicated above as the date of mailing of this Notice:

AU,BR,CN,EP,IL,JP,KP,KR,US

In accordance with Rule 47.1(c), third sentence, those Offices will accept the present Notice as conclusive evidence that the communication of the international application has duly taken place on the date of mailing indicated above and no copy of the international application is required to be furnished by the applicant to the designated Office(s).

2. The following designated Offices have waived the requirement for such a communication at this time:

AL,AM,AP,AT,AZ,BA,BB,BG,BY,CA,CH,CU,CZ,DE,DK,EA,EE,ES,FI,GB,GE,GH,HU,ID,IS,KE,KG, KZ,LC,LK,LR,LS,LT,LU,LV,MD,MG,MK,MN,MW,MX,NO,NZ,OA,PL,PT,RO,RU,SD,SE,SG,SI,SK,SL,

TJ,TM,TR,TT,UA,UG,UZ,VN,YU,ZW
The communication will be made to those Offices only upon their request. Furthermore, those Offices do not require the applicant to furnish a copy of the international application (Rule 49.1(a-bis)).

3. Enclosed with this Notice is a copy of the international application as published by the International Bureau on 22 April 1999 (22.04.99) under No. WO 99/19356

REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.

(57) Abstract

The present invention relates to a new thrombin inhibitor of formula (I) comprising an S subsite blocking segment (AS), an S' subsite blocking segment (Z), and a fibrinogen recognition exosite blocking segment (P). AS is linked to Z, which is linked to P according to the formula (1): AS-Z-P. The S' subsite blocking segment thus, besides binding to the thrombin S' subsites, connects the S subsite blocking segment and the fibrinogen recognition exosite blocking segment. This binding of Z segment together with the bindings of the AS and P segments, contributes to improve the affinity of the inhibitors significantly.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/CA97/00745

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/CA97/00745

Item V

1. Reference is made to the following documents:

D1: Biochemistry, 1993, 32, 3396-3404 D2: Biochemistry, 1994, 33, 14443-14451

D3: WO-A-9 511 921

The present application refers to trivalent thrombin inhibitors of the structure AS-2. Z-P as defined in Claim 1. The distinguishing feature of the thrombin inhibitor of the present claims and those of the prior art is Z representing a S' subsite blocking segment which links AS and P.

In D1 the linker consists of about 4 to 6 amino acids as represented in Table I (page 3399) such as GlnSerHisAsnAspGly, GlyGlyGlyGlyGlyGly or GlyGlyGlyGly whereas in the present claims the linker consists of 5 amino acids for example GlyGlyAlaGlyBAla. The features distinguishing the linkers of the present application and those of D1 is that B-Ala is at the end of the linker and that only non-polar amino acids are at position 1 and 3 of the linker in the present application. In D1 a polar amino acid such as Gln can be at position 1.

In the general part of the application it is asserted that said non-polar amino acids in the S' subsite blocking segment lead to an improved affinity of the thrombin inhibitor.

However, it is not demonstrated whether at least a broad range of the linkers of present application have indeed a higher affinity than the linkers of D1.

Therefore an objection under lack of inventive step (Article 33 (3) PCT) has to be raised.

If it is demonstrated in the regional phase that all linkers of the present application are indeed advantageous in comparison with the linkers of D1, inventive step can be acknowledged.

D2 and D3 do not appear to be relevant under Article 33 (2) and (3) EPC, since the linkers are more complex and not similar to those of the present application.

3. Claims 13 and 14 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these

INTERNATIONAL PRELIMINARY

International application No. PCT/CA97/00745

EXAMINATION REPORT - SEPARATE SHEET

claims (Article 34(4)(a)(i) PCT).

Item VII

In the description (page 10, lines 20-23) it is stated that B-Ala can be substituted with other amino acids. Therefore the linker of Claim 1 include linkers not distinguished from those of D1 such as the P198 GlyGlyGlyGlyGly linker in Table I.

Therefore said passage of the description should be deleted. The same applies to page 18, lines 5-10).

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT (PCT Rule 71.1)

Date of mailing (day/month/year)

17.01.00

Applicant's or agent's file reference

International application No.

2139-11 PCT

PCT/CA97/00745

International filing date (day/month/year)

15/10/1997

Priority date (day/month/year)

IMPORTANT NOTIFICATION

15/10/1997

Applicant

NATIONAL RESEARCH COUNCIL OF CANADA et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of th report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/CA97/00745

I.	Basis	of the	report
----	--------------	--------	--------

1.	 This report has been drawn on the basis of (substitute sheets which have been furnished to the receiving Office response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.): Description, pages: 					
	1-30	as originall	y filed	-		
	Claims, No.:					
	1-14	as originall	y filed			
2.	The amendments have	resulted in	the cance	ellation of:		
	☐ the description,	pages:				
	☐ the claims,	Nos.:				
	☐ the drawings,	sheets:				
3.	☐ This report has be considered to go b	en establish eyond the d	ed as if (s lisclosure	some of) the amendments had not been made, since they have been as filed (Rule 70.2(c)):		
4.	Additional observations, if necessary:					
٧.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement					
	Novelty (N)	Yes: No:	Claims Claims	1-14		
	Inventive step (IS)	Yes: No:	Claims Claims	1-14		
	Industrial applicability (I	A) Yes: No:	Claims Claims	1-12		

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/CA97/00745

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

INTERNATIONAL PRELIMINARY International application No. PCT/CA97/00745 EXAMINATION REPORT - SEPARATE SHEET

Item V

1. Reference is made to the following documents:

D1: Biochemistry, 1993, 32, 3396-3404

D2: Biochemistry, 1994, 33, 14443-14451

D3: WO-A-9 511 921

2. The present application refers to trivalent thrombin inhibitors of the structure AS-Z-P as defined in Claim 1. The distinguishing feature of the thrombin inhibitor of the present claims and those of the prior art is Z representing a S' subsite blocking segment which links AS and P.

In D1 the linker consists of about 4 to 6 amino acids as represented in Table I (page 3399) such as GlnSerHisAsnAspGly, GlyGlyGlyGlyGlyGlyGly or GlyGlyGlyGlyGlyWhereas in the present claims the linker consists of 5 amino acids for example GlyGlyAlaGlyBAla. The features distinguishing the linkers of the present application and those of D1 is that B-Ala is at the end of the linker and that only non-polar amino acids are at position 1 and 3 of the linker in the present application. In D1 a polar amino acid such as Gln can be at position 1. In the general part of the application it is asserted that said non-polar amino acids in the S' subsite blocking segment lead to an improved affinity of the thrombin

However, it is not demonstrated whether at least a broad range of the linkers of present application have indeed a higher affinity than the linkers of D1. Therefore an objection under lack of inventive step (Article 33 (3) PCT) has to be raised.

If it is demonstrated in the regional phase that all linkers of the present application are indeed advantageous in comparison with the linkers of D1, inventive step can be acknowledged.

D2 and D3 do not appear to be relevant under Article 33 (2) and (3) EPC, since the linkers are more complex and not similar to those of the present application.

 Claims 13 and 14 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these

inhibitor.

INTERNATIONAL PRELIMINARY International application No. PCT/CA97/00745 EXAMINATION REPORT - SEPARATE SHEET

claims (Article 34(4)(a)(i) PCT).

Item VII

In the description (page 10, lines 20-23) it is stated that B-Ala can be substituted with other amino acids. Therefore the linker of Claim 1 include linkers not distinguished from those of D1 such as the P198 GlyGlyGlyGlyGly linker in Table I.

Therefore said passage of the description should be deleted. The same applies to page 18, lines 5-10).
